Overview

Police Body Camera is a video recording system that is typically utilized by law enforcement to record their interactions with the public, gather video evidence at crime scenes, and has been known to increase both officer and citizen accountability.

No screen display, 3000mAh big capacity Li-ion battery, available to be controlled via WiFi network, convenient drop-in dock charger and USB port which can also be used to upload data from camera. Front big-sized recording button and LED ring make this camera special and full of energy.

Prompt Sounds :
Start to record: 1 audio chirp.
Stop to record: 2 audio chirps.
Take a picture: 1 audio photographing chirp.
Turn on/off Wifi: 1 audio chirp.

Getting Started

1) Power on/off

Press and hold the "Recording"button located on the front of the device(under the camera lens, No. 3 on page 1) for about 3 seconds, the unit will emit ONE audio chirp and long vibration. A green indicator on top of the unit will turn on and remain green while the unit is powered on. And the green indicator will be off after the unit is powered off.

2) Video Recording:

To record a video, press the "Recording" button located on the front of the device(under the camera lens). The unit will emit 1 audio chirps and 1 vibration. A red working indicator on top of the unit and LED ring(No. 4) on the front of the device will turn on and remain red during recording. Double-press "Recording" button to stop recording with TWO audio chirps and vibrations. Video recording CAN NOT be stopped if the total recording time is less than 5 seconds.(The unit won't give any feedback if you stop recording video within 5 seconds.)

3) Taking Photo:

To take a photo, press the "Photographing/Wifi" button located on the right side of the device(No. 10 on page 1). The unit will emit 1 audio chirp and vibration. Red working indicator(No. 14) on top of the unit and LED ring will turn on, then turn off after shooting finished.

4) WiFi Switch:

To turn on WiFi, press and hold the "Photographing/WiFi" for 3 seconds.

When the WiFi is on, a white indicator on the top of unit will be on. To turn off WiFi, press and hold the "Photographing/WiFi" button for 3 seconds, then the white indicator will be off.

5) Charging:

Place the camera in the dock, then connect the dock to an electrical outlet using USB cable (included in the accessories). When the camera is being charged, the charging indicator(No. 13 on page 1) located on top of the unit will be blue. After fully charged, the charging indicator will be off.

6) Checking remaining battery:

The unit comes with 4 battery LED indicators(No. 9 on page 1). Short press the "FN" button(No.11 On page 1), Battery Level Indicator show the following information:
"All four blue indicators" means battery remains 75%-100%
"Three blue indicators" means battery remains 50%-75%
"Two blue indicators" means battery remains 25%-50%
"One blue indicator" means battery remains less than 25%
Short press "FN" button to turn off remaining battery indicators.

7) Stealth Mode

This camera support to record in stealth mode. Long press "FN" button, all indicators and IR light will be turned off and only vibration will work when you press any button under Stealth Mode.
Long press "FN" button to disable Stealth Mode.

8) Data Browsing and Management:

Place the camera in the dock, then connect the dock to PC using USB cable (included in the accessories), then use "Cam Manager.exe" in the CD disc.

9) How to Reset?

If you are having problems with your device, please try and reset the camera using the reset button(No. 9 on page 1).

Note: Use a paper clip or finger nail to press the reset button. You will hear a "click" after the button is pressed.

10) GPS function (Optional)

When the unit come with GPS module, GPS function can be activated by holding both "Photographing" button and "FN" button for 3 seconds. GPS yellow indicator will blink until signal received. Location coordinate will be embedded into video when yellow indicator is on.
Long press both "Photographing" button and "FN" button to disable GPS function.
